SUMMARY INFORMATION

In September 2012, I was admitted to the Faculty of Engineering and Natural Sciences at Gumushane University. My thesis topic was 'LAPLACE TRANSFORMS AND THEIR APPLICATIONS.' In 2015, I completed my Javascript software development internship at Beyaz Bilgisayar company in Istanbul. I participated in music clubs, performed in concert events both on and off-campus. Additionally, I volunteered to provide mathematics education to high school seniors.

WORK EXPERIENCE

MİGROS MBM TRANSPORTATION

BUSINESS DEVELOPMENT SPECIALIST IZMIR/TURKEY(March 2023 - October 2023)

Job Description

- I received training from the logistics operations departments. I was assigned to the development of warehouse software automations and problem-solving.
- I developed an existing service planning automation for all shifts. I developed a web-based software project for the logistics and shipment department.
- I performed effectively in the Shipment department. I developed control automation for the vehicle exit operation control from the loading operation.

FUTON FURNITURE

WAREHOUSE MANAGER IZMIR/TURKEY(May 2022 - July 2022)

Job Description

- I met the material requirements for production planning.
- I managed the control and tracking process of warehouses and warehouse equipment.
- I monitored the condition of materials or products for damage and ensured the compliance of invoices and documents with company procedures.

DELFIN ARCHIVE

LOGISTICS AND PROJECT MANAGER, IZMIR/TURKEY(July 2017 - March 2022)

Job Description

- I modeled projects and prepared business plans according to the needs of corporate customers.
- I hired and trained blue-collar and operational staff according to the business plan.
- I enhanced operations' efficiency by utilizing software solutions such as automation, warehouse software, and inventory management systems.
- Focusing on software development in projects, I improved internal software optimization and provided customized solutions to enhance business processes.
- I worked in project sales for corporate companies for 1.5 years, developing software solutions tailored to customer needs during this period.
- In addition to blue-collar management and Excel training, I organized training sessions in software development.

-Providing SQL training to the IT department, I utilized my software skills in the storage and organization of complex and large datasets.

-While implementing the 5S model to improve warehouse organization and efficiency, I integrated software-based tools into this process.

-I categorized and modeled the archives of all departments, creating a sustainable archive management system by projecting the software, hardware, and licensing requirements for each model as a Project Management Document.
